

THE PRINTERY SHAPES

INVITATIONS, MENUS, RSVP, INFO CARDS...

12 of our most popular shapes are included as physical samples in this sleeve. Below are the details about each item you'll need to order them by. Please refer to this sheet for die/product names of your physical samples.

DIE LINES

Our die lines are available free to download for your use. Whether it's to create a mockup for a client or to create artwork for printing. You'll find all our die lines located in our Help Centre.

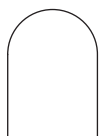

CUSTOM SHAPES

Got a unique, funky shape you've created? We've got options for digital die cutting (for digital print on our standard thickness stocks) and traditional die cutting (for double thick stocks or letterpress, foiled and embossed products on standard thickness stocks).

As soon as we've set up your file (digital) or manufactured a unique die (traditional) for you, then there'll never be a set-up cost to pay again. We'll keep your die file or physical die in a library for you to use again and again.

You can order 1 of a digital die-cut product (not traditional sorry) but you'll pay the set-up fee for that sample. If you go ahead then you won't pay the set-up fee again though.

Digital die cutting - Please be sure to keep a note of your file name for future orders.

HOW TO ORDER

1. Order your printed product (digital, letterpress, foil press - whatever) based on your envelope size.
2. Add die cutting in the shape you want that goes with your printing size.

NOTE: Be sure to order your printing and die cutting in the same size i.e. A5 printing = A5 die cutting.

PRINTED LARGER SHAPES

Item indicated with ** are non-standard sizes and are ordered separately under the heading "170x170mm Shapes" on our website as they don't fit into any of our standard envelopes.

THE PRINTERY TAGS AND PLACECARDS

12 of our most popular Printery tags, placecards and business cards are included as physical samples in this sleeve. Below are the details about each item you'll need to order them by. Please refer to this sheet for die/product names of your physical samples.

DIE LINES

ENVELOPES AND ENVELOPE LINERS

We manufacture and stock our warehouse shelves with 600+ different envelope styles, colours and sizes. Each of our current range of envelope sizes and flap styles, together with any envelope liner die shapes are included as physical samples in this sleeve.

Refer to this sheet for envelope sizes and liner die availability.
Refer to our website for envelope availability in each stock found in your Paper Swatch Books.

ENVELOPE LINERS

Envelope liners can be custom printed or blank and are made to order. The die lines are available on our Help Centre.

NEW SIZES OR FLAP STYLES

When we add a new envelope size, simply order a single sample and add to your sleeve and download the liner die line and hand-cut a sample.

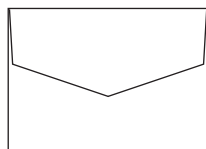

CUSTOM ENVELOPES

Envelope dies are different to regular/forme cut dies as they're forged from a single sheet of steel and are designed to die cut about 200 sheets at a time. Envelope dies cost around \$2500 each to manufacture so the investment means they're more suited to large runs of envelopes.

If you're looking to create your own envelope style for smaller events, you can create a custom shape providing your dieline is no larger than A3. Your envelope can be printed or unprinted, supplied flat for you to assemble or assembled ready for you to seal.

Email our Customer Service Team hello@peterkin.com.au with your envelope die line, quantity and stock and we'll quote you including the custom die manufacturing charge.

POCKETS AND SLEEVES

Physical samples included here are of our most popular shapes and below are all our in-house pocket die shapes available to you.

Not all stocks are suitable for scored products like pockets or sleeves. (Check what stocks are available by choosing a scored product on the website and viewing the stock options.)

DIE LINES

Our pocket die lines are available free to download for your use. Whether it's to create a mockup for a client, or to create artwork for printing on your pocket... You'll find all our die lines located in our Help Centre.

CUSTOM SHAPES

Traditional dies produce the best results for scored products like pockets and sleeves.

Scoring is not as deep/crisp when digitally die cut.

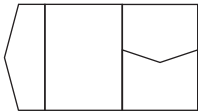

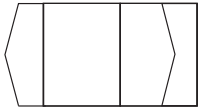

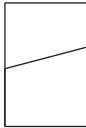

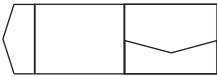

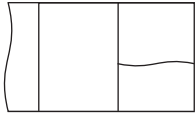

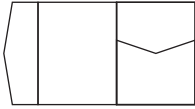

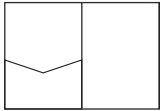

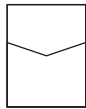

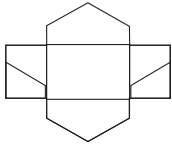

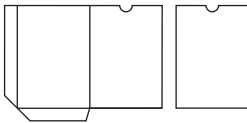

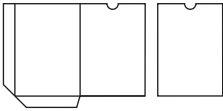

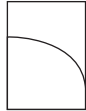

If you've designed a custom shape pocket or sleeve choosing digital die cutting is a great way to test your die line as a mock up.

This is especially important for dies involving scoring and flaps.

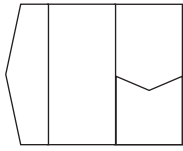

For the best results however, consider upgrading to a traditional die which has superior scoring and will fold with more precision.

The minimum size for cut outs and holes is 3mm.

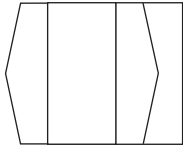

Our Pockets and Sleeves are designed to fit into our standard envelope ranges. They're a little smaller to fit inside the envelopes so don't forget to make your cards smaller as well to fit in the pockets or sleeves. You can find suggested insert sizes on our Help Centre.

RIGID SIGNAGE & POSTERS

WELCOME SIGNS, MENUS, SEATING CHART, TABLE NUMBERS...

The Printery offers large format flat-bed printing with CMYK and white UV-curable inks. Vibrant, quality, single-sided results are available on over 100+ Peterkin stocks (standard thickness up to 350gsm) or our environmentally friendly 3.8mm Eco Board.

A sample of the 3.8mm Eco Board is included in this Style Studio. To see the Peterkin stocks available for posters, please refer to our Swatch Books.

DIE LINES

Our die lines are available free to download for your use. Whether it's to create a mockup for a client or to create artwork for printing. You'll find all our die lines located in our Help Centre. We offer optional 10mm hanging holes at the top corners (standard position but changes depending on size and shape).

CUSTOM SHAPES

You can create your own custom shape for Rigid Signage and Posters. As soon as we've set up your file (digital) then there'll never be a set-up cost to pay again. We'll keep your die file in a library for you to use again and again.

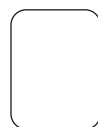

Please be sure to keep a note of your file name for future orders.

STOCKS

Peterkin's range of stocks for poster printing, and 3.8mm Eco Board produce fantastic results for signage, but aren't suitable for the highest quality photographic reproductions due to the stock texture. If you require the highest quality photo reproduction (art prints), then you should consider contacting a specialist printer.
